

R&A Motorsports Inc. has designed 5 different performance packages for the 2008 Twister Special™. The models have been rated on the “Enhanced Fujita” scale. This is what meteorologist use to describe the intensity and power of a twister. Keep in mind the Ford Mustang GT is a raw 300HP fire breathing dragon that gets you to work faster than the U.S. government allows.

All five packages have been put together for maximum “fun per mile” driving.
You asked for it, and we agree. It’s naughty time!

Your “base model” or EF-1 2008 Twister Special™ has an added ram air shaker and racing exhaust that add more power, efficiency, and a little growl. Expect around 315HP.

EF-2 package-- adds stronger gears for that “dig into the pavement” feel, and a throttle body change for enhanced accelerator response. All brought together with the tuner to maximize performance. And a super cool push to start button. Expect around 325HP. \$2195.00.

EF-3 package-- builds on the above and adds shortie headers, and high flow cats for even better performance and a great throaty growl. Now that she is running more efficiently, let’s add better handling with front and rear sway bars, high performance springs, shocks and struts. You will ride smoother and handle like a race car. Expect around 345HP. \$5795.00. (Entitled to \$450.00 cash back)

EF-4 package— includes all of the above. You are now dug into the pavement, and screaming around turn 3 into the straight-a-way, let’s kick her hard. A Procharger super-charger that will increase power at least 50% and a one piece drive shaft that gives the backbone to handle all that new found power. Just for safety we add a drive shaft safety loop. Expect around 450HP. \$14,795. (Entitled to \$750.00 cash back)

EF-5—this monster will require a complete engine change to the 5.4 liter engine fully blown, new transmission, full roll cage, and a bible. Expect 200 MPH, and over 500HP! Only 2 will be made. \$100,000.

All manual transmission customers can add a Hurst shifter for only \$469.95.

All manual transmission customers can add racing pedals for only \$99.00

All automatic transmission customers can add racing pedals for only \$79.00

All prices current as of 12-06-07.

Due to a volatile oil market, prices are subject to change.
